## Presentation

Plant biotechnology is today a major strategic lever to address global challenges such as food security, climate change adaptation, and the transition to sustainable agriculture.

This national seminar aims to bring together researchers, academic staff, PhD students, and professionals to encourage scientific exchange, promote research findings, and support innovations in the field of biological resources.

We are pleased to announce the «**2nd National Seminar on Biotechnology, Valorization of Biological Resources, and Innovation (SBVRBI'26)**», which will be held at M'Hamed Bougara University of Boumerdès on November 11, 2026.

Three major thematic areas will be addressed, reflecting the richness and relevance of current research in biotechnological valorization. These themes are at the heart of today's scientific concerns and are generating growing interest within the research community..

## Topics

**This seminar will focus on the following topics**

- **Topic 1: Biotechnology and valorization of of plant resources**
- **Topic 2: Microbial biotechnology, valorization of microflora**
- **Topic 3: Conservation of bees and useful insects and promotion of beekeeping products**

## Important dates :

**Call for communication :** *Jun 11, 2026*

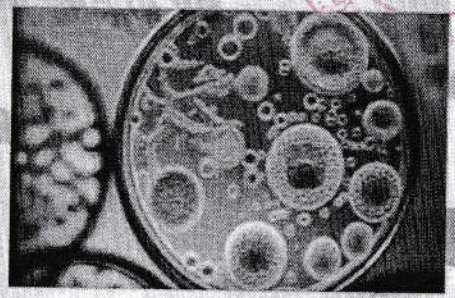

**Abstract Deadline submissions :** September 20 , 2026
